WORK EXPERIENCE

Front End Software Developer Lovespace

04/2017 – Present

London

Tech-based storage company

Achievements/Tasks

- Managing the front-end development of the Lovespace website, via WordPress, AngularJS and jQuery.
- Converting customer order flows from jQuery to AngularJS.
- Led f/e aspect of internationalisation project, using WordPress Multisite, encoding to allow for translation and making necessary adjustments for new international markets.
- Created dashboard for fulfilment customers to track their stock. Near-greenfield project from scoping APIs to delivering in full - and on time.
- Recently led f/e implementation of major redesign of the main order funnel.
- Working with the product department to scope and produce major or minor updates to the website, providing timely updates as per business requirements.
- Currently working on expanding warehouse admin site to provide further performance tracking tools.

Junior Web Developer Goodman Fox

08/2016 – 12/2016

Amersham

Small digital agency

Achievements/Tasks

- Transferring hard-coded websites to Wordpress, ensuring easy functionality for the website owner through custom Wordpress post types, taxonomies, etc.
- Implemented website from designer spec in full for <https://www.gchqpuzzlebook.co.uk> – ensuring it worked responsively on both desktop and mobile.
- Carried out numerous styling improvements and coding corrections on <https://www.capeverdechoice.com> and other similar sites in the portfolio.

Previously worked in accounts-based roles

JSON

PERSONAL PROJECTS

Designed and fully built <http://nearyservices.co.uk> as a first professional client website.

Recently finished move to WordPress for a client whose previous developer had abandoned their site half-built - <http://woodlandtennis.co.uk/>

Also run a few WordPress blogs, a mixture of child themes, some fully self-built.
